Permanent Erasure

Because the HD-2SS generates a high-powered magnetic field ensuring complete erasure. Magnetic erasure also means there's no software to buy, update, or upgrade. The HD-2SS technology used to erase magnetic hard drives and tape media will never become obsolete due to software or driver modifications.

SSD-CADDY

Conveniently holds the SSD-1 and SSD-MT sleeves for operator ease and accessibility. Provides a secure base for the PD-5 to create a compact, organized, and stable destruction accessory station.

SSD-MT

The SSD-MT sleeves hold smaller flash and thumb drives when using the SSD-1 solid-state destroyer.
